HOW TO READ THIS REGISTRY
The registry is organized with the core mature universe first (Parts 1 to 6), followed by the separate, younger-audience Cuddleverse (Part 7). Each entry gives a name and a short description. Canon status is explained in Part 8.
Content note: Parts 1 to 6 contain mature themes, including horror, violence, apocalypse, and human experimentation. Part 7, the Cuddleverse, is written for a younger teen audience (about 13 and up) and is kept separate from the main brand.
THE REALITIES AT A GLANCE
Zion-7 - The primary reality: the main parallel Earth of the WOTL universe, where the creator explores what he wants to say about our own world. Most stories take place here.
Blighted Earth - A separate parallel Earth, not Zion-7. It also suffered a zombie apocalypse, but one started by genetic food modification. It is the origin of Nutrigen and shows that each parallel Earth has similarities to the others.
The Astral Plane - The cosmic prison of the Red Tendril Creature, governed by the Neutral

Astria.
The Space Universe - Alien worlds, Merchant Outpost, the Intergalactic Police, and the Monstrosity Galaxy Network (MGN).
The Cuddleverse - A separate galaxy of Cuddle Planets, written for a younger audience.
PART 1 - COSMOLOGY: THE MULTIVERSE
The highest layer of the WOTL mythology: the first evil, the Neutrals, the Gods, and the Serathane.
The Primary Threat
The Red Tendril Creature - The primary multiverse-level villain of WOTL Productions and the first evil to take physical form. A primordial entity associated with distortion, temporal anomalies, realities, and catastrophic multiversal events. It corrupted Satan and the one third of the angels who fell. It has been imprisoned in the astral plane since Satan's fall.
The Neutrals
Immortal beings who do not take sides between good and evil. For the Neutrals, maintaining order is a job, because someone has to do it.
Death - A cosmic Neutral representing the force and concept of Death. Collects souls.
The Gatekeeper - A powerful Neutral who guards passages, boundaries, and access between realms. Takes collected souls to their final destination, heaven or hell.
Astria - A Neutral who governs the astral plane, the prison of the Red Tendril Creature. Her job is to make sure it never escapes, a duty she has held since Satan's fall.
The Archivist - A Neutral who keeps the record of everything, like a statistician, because history is educational.
The Gods
Four divine beings who together embody the main aspects of a single supreme divine nature.
Nabris - Embodies male energy. Husband of Serathis.
Serathis - Embodies the vengeful side. Wife of Nabris. She had a part in the creation of the Serathane, which Nabris knows.

Ashuron - The son. Embodies the desire for justice and creates vengeance spirits from those who were wronged.
Cedite - The daughter. Embodies the pure, righteous, caring spirit shared by the father and son.
The Serathane Family
The Serathane - Hybrid offspring of fallen angels, half reptilian and half human. They are shape-shifters, and holding their more snake-like forms takes enormous amounts of supernatural energy. Some of the most dangerous supernatural beings in WOTL mythology, and the main villains of WOTL Productions. In the arcade game Valmont: Bloodline they appear as snake-people who shift into giant snakes.
Mortas Thorne - A powerful member of the Serathane lineage. One of the three fully developed Serathane characters.
Helena Campos Canto - Sister of Mortas Thorne. From Brazil, based on the Brazilian fire snake myth. One of the three fully developed Serathane characters.
Li Mei Xu - Daughter of Mortas Thorne and a vengeance spirit (see Part 2). Half mutant and half

Serathane, with Chinese dragon mythology at her root. One of the three fully developed Serathane characters.
Satan and Medusa - Major fallen supernatural figures of Serathane mythology. They fill gaps in the lore (history and origins) and serve as boss characters in WOTL games.
PART 2 - ZION-7: HORROR AND THE SUPERNATURAL
Locations
Raven Hill - The main haunted location of Zion-7, set in Michigan. Plenty of the WOTL horror stories take place here.
Eldridge Village - The horror soap opera counterpart of Raven Hill, home to ghost stories of dead lovers who return.
Brighton Springs and Union City - Fictional cities in Ohio, fictional versions of Cleveland and Columbus that give the stories freedom beyond real-world accuracy.
All inhabitants, creatures, civilians, officials, families, and supporting characters of these locations belong to the WOTL character and lore registry.
Raven Hill Police Department
Detective Webb - An old-school detective and one of the principal detectives of the Raven Hill Police Department.
Dana - Caucasian female police officer of the Raven Hill Police Department. Partner of Keisha.
Keisha - African-American female police officer of the Raven Hill Police Department. Partner of Dana.
Dana and Keisha help Webb work out what is happening in Raven Hill. They face government cover-ups of the supernatural.
The Valmonts
The Valmonts - A family of legendary monster hunters through the ages. They fight all monsters to build their legacy, though the Serathane are the main villains of WOTL Productions. The arcade game Valmont: Bloodline is about Bryce and Victoria.
Bryce Valmont - A knight and one of the two main Valmonts. A relative of Victoria from a different time period.

Victoria Valmont - A vampire hunter and one of the two main Valmonts. A relative of Bryce from a different time period.
Cedric and Elena Valmont - Brother and sister, descendants of Bryce Valmont, and the great-grandparents on the Valmont family tree.
Vengeance Spirits
Vengeance spirits are created by Ashuron from those who were wronged.
Bill "Boo" Bradley - A Texas sheriff wrongly killed when he refused to sell his property during the expansion of the Old West. He returns as a vengeance spirit.
Hirata Miyoko - A Japanese girl who dies after a sexual assault and returns as a vengeance spirit.
Keiko Arai - Japanese character and friend of Hirata Miyoko in life.
Li Mei Xu - Dies before 2037 because her GENEP54 mutation made her look different on the outside. Ashuron brings her back blessed with power as a vengeance spirit. See also Part 1.

Other Supernatural Figures and Groups
The Root of Days - A powerful forest and swamp guardian associated with nature and ancient forces.
The Eternal Vigil Cult - A villainous secret-society cult operating within the WOTL universe, the creator's take on a world-controlling conspiracy.
The Cat Lady - A mysterious urban-legend character, rumored to be behind missing people, taken to feed her cats.
Music and Culture
BBC - Bomb Brothers Crew - A rap group of Zion-7.
Viral Versace - The only female rapper and a member of the BBC rap group.
PART 3 - THE APOCALYPSE AND SURVIVAL (2037)
A zombie apocalypse in 2037, caused by an experiment with mutant DNA (see Part 4). The WOTL: Last Stand material and the survival characters belong here.

PART 4 - SCIENCE, EXPERIMENTATION, AND CORPORATE HORROR

Lazarus, LBI, and the Nest
Lazarus - The codename of a mutant test subject who heals from everything.
Lazarus Biotechnology Institute (LBI) - A villainous biotechnology organization named after Lazarus. It studied his powers to create super soldiers who could heal from everything, and received government funding. H9 Pharmaceutical was originally a separate company and merged under the LBI name. The experiments cause people not to stay dead, because human and mutant DNA are incompatible. This led to the 2037 zombie apocalypse.
H9 Pharmaceutical - A fictional pharmaceutical and biomedical company associated with human, animal, research, and medicine experimentation. It later merged into LBI.
The Nest - A government program created to deal with the mutant problem once the government realized how powerful some mutants are, in the spirit of mutant-hunting sentinels.

Pathfinder - A Nephilim hybrid of enormous, kaiju-scale proportions. Created when Nephilim DNA was manipulated to produce modified zombie types and giant beings that are not natural.
Scientists
Dr. Mercer - LBI scientist and researcher associated with experimental events within the WOTL universe.

GENEP54 - A rare genetic phenomenon behind mutants and superhuman abilities. Fewer than one percent of the population of Zion-7 and other parallel Earths are mutants. They react to sunlight differently, and their powers manifest at puberty. B-class mutants are less powerful when their powers manifest because they absorb sunlight less intensely.
Deuce Diamond - African-American GENEP54-b subclass mutant from Detroit, Michigan. A rare exception to the puberty rule: his skeleton needed time to build up its density, and his powers fully manifested at age

33. Diamond-hard skeleton. Antihero, neighborhood protector, and legend of Detroit.
